For your safety and continued enjoyment of this product, always read the instruction book carefully before using.
IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock and/or injury to persons, including the following:

1. READ ALL INSTRUCTIONS.
2. Do not touch hot surfaces. Use handles and knobs.
3. To protect against electric shock, do not place cord, plug, or base in water or other liquids.
4. Close supervision is necessary when any appliance is used by or near children.
5. Always unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts and before cleaning the appliance.
6. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been dropped or damaged in any manner. Return appliance to the nearest Cuisinart® Repair Center for examination, repair, or electrical or mechanical adjustment.
7. The use of accessory attachments not recommended by Cuisinart may cause injuries.
8. Do not use outdoors.
9. Do not let cord hang over edge of table or counter, or touch any hot surface.
10. Do not place on or near a hot gas or electric burner, or in a heated oven.
11. Always fill water reservoir first, then plug cord into the wall outlet. To disconnect, turn controls to Off, then remove plug from wall outlet.
12. Do not use appliance for other than intended use.
13. Turn lid securely onto carafe before serving any beverages.
14. Scalding may occur if the lid is removed during the brewing cycle.
15. The thermal carafe is designed for use with appliance base only. It must never be used on the range top.
16. Do not set a hot carafe on a wet or cold surface.
17. Do not use a damaged carafe or a carafe with a loose or weakened handle.
18. Do not clean carafe or warming plate with cleansers, steel wool pads, or other abrasive materials.
19. WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT REMOVE THE BASE PANEL. NO USER-SERVICEABLE PARTS ARE INSIDE. REPAIR SHOULD BE DONE ONLY BY AUTHORIZED PERSONNEL.
20. Avoid contact with moving parts.

SAVE THESE INSTRUCTIONS
FOR HOUSEHOLD USE ONLY
SPECIAL CORD SET INSTRUCTIONS
A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
Longer extension cords are available and may be used if care is exercised in their use.
If a long extension cord is used, the marked electrical rating of the extension cord must be at least as great as the electrical rating of the appliance, and the longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over.

NOTICE
This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not modify the plug in any way.

OPERATING NOTICE
Clogging and backing up of water and/or coffee in the filter basket can occur under any or a combination of any of the following conditions: The use of too finely ground coffee, using two or more paper filters, using the gold tone filter in conjunction with a paper filter or not properly cleaning coffee grounds from the gold tone filter, or allowing coffee grounds to spill over the filter.

Caution: Never open the reservoir cover during the brewing cycle, even if no water is draining from the filter basket, since extremely hot water/coffee can spill out from the basket and cause injury. If water/coffee is not draining from the filter basket during the brewing cycle, unplug the unit and wait 10 minutes before opening the reservoir cover and checking the basket.

WARNING
RISK OF FIRE OR ELECTRIC SHOCK
DO NOT OPEN

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK)
NO USER-SERVICEABLE PARTS INSIDE
REPAIR SHOULD BE DONE BY AUTHORIZED SERVICE PERSONNEL ONLY
THE QUEST FOR THE PERFECT CUP OF COFFEE

Element 1: Water
Coffee is 98% water. The quality of that water is as important as the quality of your coffee. If water doesn’t taste good from the tap, it won’t taste good in your coffee. Cuisinart includes a charcoal water filter to remove chlorine, bad tastes and odors, for the purest coffee flavor, every time you brew.

Element 2: Coffee
While coffee is 98% water, all of the flavor comes from the beans. To achieve the same great taste you enjoy at a coffee bar, you need to use the same quality of coffee. If you choose to grind your own beans, buy them fresh and whole. Buy only about a two-week supply at a time, because once the bean is broken, its flavor degrades quickly.

Element 3: Grind
The grind is critical for proper flavor extraction. If the grind is too fine, over-extraction and bitterness will result. Too fine a grind may also clog the filter. If grind is too coarse, the water will pass through too quickly and the maximum flavor will not be extracted. When grinding your own beans, we recommend a medium-fine grind.

Element 4: Proportion
Coffee that is too strong or too weak is always a disappointment. Follow the recommended portions of ground coffee in the instructions under MAKING COFFEE (page 8), and later adjust the amount to suit your taste.

IMPORTANT UNPACKING INSTRUCTIONS
1. Place the box on a large, sturdy, flat surface.
2. Remove the instruction book and any other literature.
3. Turn the box so that the back side of the coffeemaker is down and slide the coffeemaker from the box.
4. After the coffeemaker has been removed, place the box out of the way and remove the top and bottom two polyfoam inserts.
5. Grasp the carafe by its handle, remove it from the resting plate and remove the polybag.
6. Remove the polybag covering from the coffeemaker and lift the coffeemaker off the remaining two inserts.

We suggest you save all packing materials in the event that future shipping of the machine is needed. Keep all plastic bags away from children.
FEATURES AND BENEFITS

1. Reservoir Cover
   Flips back for easy filling.

2. Water Reservoir with Water Level Indicator Window

3. Showerhead (not shown)
   Distributes water evenly over coffee, reducing temperature loss as water passes through grounds.

4. Charcoal Water Filter (not shown)
   Eliminates chlorine, calcium and bad tastes and odors from water.

5. Filter Basket (not shown)
   Holds paper or Cuisinart® permanent gold-tone filters.

6. Filter Basket Holder

7. Permanent Gold-Tone Commercial-Style Filter (not shown)
   Eliminates the need for paper filters. Always position the filter handle toward the front of unit so it doesn’t interfere with the flow of coffee into the filter basket. NOTE: Some fine grounds may flow through the filter and appear as sediment in the carafe.

8. Brew Pause™
   Stops flow of coffee from basket when carafe is removed (30 seconds max) from the heater plate, so a cup can be poured mid-brew. Since the flavor extraction rate varies during the brew cycle, we recommend allowing the brewing cycle to finish before pouring the coffee.

9. Thermal Carafe with Hands-Free Lid
   The dripless, double-wall insulated 10-cup thermal carafe keeps coffee hot. Coffee drips through the unique brew-through/pour-through lid, and when brewing is complete, the lid seals itself to keep air out and preserve fresh coffee flavor. No need to turn or adjust it to pour.

10. Resting Plate
    Scratch resistant with black, nonstick coating.

11. Ready Tone
    Signals the end of the brew cycle with five beeps.

12. Cord Storage (not shown)
    Convenient storage area keeps counters clear.

13. Power Loss Back-up System (not shown)
    One-minute protection in case power fails, breaker trips, or unit is unplugged.

14. Measuring Scoop (not shown)
GETTING TO KNOW YOUR CONTROL PANEL
Detailed programming and use instructions are on pages 7 and 8.

Clock/ LCD Display
Displays time of day and Auto On times.

On/Off Button with LED Indicator
Turns coffeemaker on and off.

PROG (program) Button
Select to program Auto On time. Coffeemaker can be programmed to automatically start brewing up to 24 hours in advance.

Self Clean Button
Indicates time to clean coffeemaker to remove calcium buildup.

Hour Button
Use to program clock and Auto On function.

Minute Button
Use to program clock and Auto On function.

1-4 Cup Setting
Improves extraction, flavor and temperature when brewing fewer than 5 cups.
PROGRAMMING YOUR COFFEE MAKER

SETTING THE CLOCK
When the coffeemaker is plugged in, 12:00 will appear until you set the time.

Hold down the Hour or Minute button until the clock begins flashing. Press either button to select the desired time. Hold buttons down to scroll through the digits, or press and release to advance one digit at a time. When scrolling, the numbers will advance slowly and then speed up. When the number displayed approaches the desired time, press and release to advance one digit at a time. Be sure the PM indicator is on if a PM time is desired.

SETTING THE AUTO ON TIME

1. Press and hold the Program (PROG) button until the display flashes. You are now in program set mode.

2. Follow directions under SETTING THE CLOCK (above) to program your start-brew time.

3. Press the start button to exit program set mode. Mode will be exited automatically if no button is pushed. The Green indicator light should be illuminated to indicate that the Auto On function is on.

NOTE: To start brew time at the same time the next day, simply press PROG. When green indicator light comes on, brewing will start at the time you’ve selected.

CHARCOAL WATER FILTER
Your coffeemaker comes with a charcoal water filter that eliminates chlorine, bad tastes and odors from tap water.

Inserting the Water Filter

- Remove the filter from polybag and soak it, fully immersed, in cold tap water for 15 minutes.
- Lift the water filter holder out of the water reservoir (see diagram, page 5).
- Press down on the filter compartment and pull toward you to open.
- Place filter into the holder and snap it closed. Be careful – improper placement can tear the filter skin.
- Flush filter by running cold tap water through holes in bottom of compartment for 10 seconds.
- Allow the filter to drain completely.
- Slide the water filter holder back into the channel in the water reservoir, pushing it down to the base of the unit.

NOTE: We recommend changing the water filter every 60 days or after 60 uses, and more often if you have hard water. Replacement filters can be purchased in stores, by calling Cuisinart® Customer Service, or at www.cuisinart.com.
BEFORE BREWING YOUR FIRST POT OF COFFEE

During the manufacturing process, dust can get trapped in your coffeemaker. We recommend flushing out the system before brewing your first pot of coffee. Simply fill the reservoir and power on the unit. (See steps #2, #5 and #6 in MAKING COFFEE instructions, below). **DO NOT ADD COFFEE!**

Once you’ve done that, brew a pot of real coffee and get ready to enjoy Cuisinart at its best!

MAKING COFFEE

Follow instructions in “Before Brewing Your First Pot of Coffee” above.

1. Insert charcoal water filter
   Follow directions for the preparation and insertion of the filter on page 7.

2. Fill the water reservoir
   Open the reservoir cover by lifting it up. Pour in the desired amount of water using the side water level indicator window located at the side of the coffeemaker.

3. Set cup preference
   Push the 1-4 cup button if you are brewing fewer than 5 cups.

4. Add the ground coffee
   Remove the filter basket by grasping the handle and lifting straight up, and then place it on the countertop. Insert a #4 paper filter or permanent filter. Be sure that the paper filter is completely open and fully inserted in the basket. It may help to fold and flatten the seams of a paper filter beforehand. Add one level scoop of ground coffee per cup. Adjust the amount according to taste.

   Replace the filter basket in the filter basket holder and press firmly on cover to be sure it closes securely.

   **NOTE:** The maximum capacity for ground coffee is 15 tablespoons for this coffeemaker. Exceeding this amount may cause overflow if the coffee is too finely ground.

5. Before brewing coffee
   Make sure the thermal carafe is in position on the resting plate and the top cover is closed. Plug the cord into an electrical outlet.

6. Power unit
   Press the On/Off button, and the red indicator light will turn on. Or, press the PROG button and the green indicator will light, and the delayed start time you’ve selected will appear in the LCD display.

7. After brewing is complete
   Coffee will continue to stream from the filter for several seconds.

Brew Pause™ Feature

This feature interrupts the flow of coffee from the basket to let you pour that first cup mid-brew. Because the flavor profile of coffee brewed at the start of a cycle differs from that brewed towards the end, be aware that using this feature will weaken the flavor strength of the finished pot.

**NOTE:** Removing carafe for more than 20 seconds may cause filter basket to overflow.
CLEANING AND MAINTENANCE

Always turn coffeemaker off and remove the plug from the electrical outlet before cleaning.

Lift up the reservoir cover. Remove and discard the paper filter and ground coffee. The filter basket can be washed in warm, soapy water and rinsed thoroughly, or cleaned in the upper rack of the dishwasher. Dry all parts after use.

**Do not put any water in the unit once the filter basket has been removed. Wipe the area under the filter basket with a damp cloth.**

Remove the carafe from the resting plate. Discard any remaining coffee. The carafe and lid can be washed in warm, soapy water and rinsed thoroughly, or placed in a dishwasher. The carafe and carafe lid should be placed on the upper rack only.

Do not use any scouring agents or harsh cleansers on any part of the coffeemaker.

Never immerse base unit in water or other liquid. To clean base, simply wipe with a clean, damp cloth and dry before storing. Fingerprints and other blemishes on the housing can be washed off with soap and water or a nonabrasive cleaning solution. Wipe resting plate with a clean, damp cloth. Never use rough, abrasive materials or cleansers to clean the resting plate. Do not dry the inside of the water reservoir with a cloth, as lint may remain.

**Decalcification**

Decalcification refers to the removal of calcium deposits which form over time on the metal parts of the coffeemaker.

For best performance from your coffeemaker, decalify the base unit from time to time. The frequency depends upon the hardness of your tap water and how often you use the coffeemaker. The flashing Clean light will indicate when you should clean your coffeemaker.

If the Clean light begins to flash when the coffeemaker is turned on, it is telling you that the calcium buildup is interfering with the functioning of your coffeemaker and the flavor of your coffee. To clean, fill the water reservoir to capacity with a mixture of \( \frac{1}{3} \) white vinegar and \( \frac{2}{3} \) water. Press the Clean button. When the self clean light glows, turn the coffeemaker on by pressing the On/Off button. The Clean light will shine steadily. The coffeemaker is now in clean mode. One cycle should be sufficient to adequately clean the coffeemaker. When the cycle is completed and the five beeps sound, the coffeemaker will shut off. Turn the coffeemaker on to see if the Clean light continues to flash. If it does, turn it off and then repeat the cleaning procedure with a fresh solution of vinegar and water.

If the Clean light no longer flashes, turn the coffeemaker off and then run one cycle of fresh cold water through the unit before using the unit again to brew coffee.

**Notes on the Clean Function**

Pressing the Clean button cancels all other settings. If it is pressed accidentally, press it again to return the coffeemaker to all its previous settings. Pressing On/Off will also exit the clean mode and turn the coffeemaker off.
WARRANTY

LIMITED THREE-YEAR WARRANTY

This warranty is available to consumers only. You are a consumer if you own a Cuisinart® Flavor Brew® 10-Cup Programmable Coffeemaker that was purchased at retail for personal, family or household use. Except as otherwise required under applicable law, this warranty is not available to retailers or other commercial purchasers or owners.

We warrant that your Cuisinart® Flavor Brew® 10-Cup Programmable Coffeemaker will be free of defects in materials and workmanship under normal home use for 3 years from the date of original purchase.

We suggest you complete and return the enclosed product registration card promptly to facilitate verification of the date of original purchase. However, return of the product registration card does not eliminate the need for the consumer to maintain the original proof of purchase in order to obtain the warranty benefits. In the event that you do not have proof of purchase date, the purchase date for purposes of this warranty will be the date of manufacture.

If your Cuisinart® Flavor Brew® 10-Cup Programmable Coffeemaker should prove to be defective within the warranty period, we will repair it, or if we think necessary, replace it. To obtain warranty service, simply call our toll-free number 1-800-726-0190 for additional information from our Customer Service Representatives, or send the defective product to Customer Service at Cuisinart, 150 Milford Road, East Windsor, NJ 08520.

To facilitate the speed and accuracy of your return, please enclose $10.00 for shipping and handling of the product.

Please pay by check or money order (California residents need only supply proof of purchase and should call 1-800-726-0190 for shipping instructions).

NOTE: For added protection and secure handling of any Cuisinart® product that is being returned, we recommend you use a traceable, insured delivery service. Cuisinart cannot be held responsible for in-transit damage or for packages that are not delivered to us. Lost and/or damaged products are not covered under warranty. Please be sure to include your return address, daytime phone number, description of the product defect, product model number (located on bottom of product), original date of purchase, and any other information pertinent to the product's return.

Your Cuisinart® Flavor Brew® 10-Cup Programmable Coffeemaker has been manufactured to the strictest specifications and has been designed for use with the authorized accessories and replacement parts.

This warranty expressly excludes any defects or damages caused by accessories, replacement parts, or repair service other than those that have been authorized by Cuisinart.

This warranty does not cover any damage caused by accident, misuse, shipment or other ordinary household use.

This warranty excludes all incidental or consequential damages. Some states do not allow the exclusion or limitation of these damages, so they may not apply to you.

CALIFORNIA RESIDENTS ONLY:

California law provides that for In-Warranty Service, California residents have the option of returning a nonconforming product (A) to the store where it was purchased or (B) to another retail store which sells Cuisinart® products of the same type.

The retail store shall then, at its discretion, either repair the product, refer the consumer to an independent repair facility, replace the product, or refund the purchase price less the amount directly attributable to the consumer's prior usage of the product. If the above two options do not result in the appropriate relief to the consumer, the consumer may then take the product to an independent repair facility if service or repair can be economically accomplished. Cuisinart and not the consumer will be responsible for the reasonable cost of such service, repair, replacement, or refund for nonconforming products under warranty.

California residents may also, according to their preference, return nonconforming products directly to Cuisinart for repair, or if necessary, replacement, by calling our Consumer Service Center toll-free at 1-800-726-0190.

Cuisinart will be responsible for the cost of the repair, replacement, and shipping and handling for such products under warranty.

BEFORE RETURNING YOUR CUISINART® PRODUCT

If you are experiencing problems with your Cuisinart® product, we suggest that you call our Cuisinart® Service Center at 1-800-726-0190 before returning the product serviced. If servicing is needed, a representative can confirm whether the product is under warranty and direct you to the nearest service location.

Important: If the nonconforming product is to be serviced by someone other than Cuisinart’s Authorized Service Center, please remind the servicer to call our Consumer Service Center at 1-800-726-0190 to ensure that the problem is properly diagnosed, the product serviced with the correct parts, and the product is still under warranty.
Cuisinart offers an extensive assortment of top quality products to make life in the kitchen easier than ever. Try some of our other countertop appliances and cookware, and Savor the Good Life®.
